

**BABA FARID SUGAR  
MILLS LIMITED**

**Cost Audit for The Year  
Ended 30 September 2025**

**COST AUDITORS' REPORT TO THE DIRECTORS OF BABA FARID SUGAR MILLS LIMITED**

We Rahman Sarfaraz Rahim Iqbal Rafiq, Chartered Accountants, having been appointed to conduct an audit of cost accounts of M/s Baba Farid Sugar Mills Limited (the Company) have examined the books of account and the statements specified under first proviso to sub-section (1) of section 220 of the Companies Act, 2017 and the other relevant record for the year ended on 30 September 2025 and report that. –

We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of this audit.

In our opinion –

- a. proper cost accounting records as required by first proviso to sub-section (1) of section 220 of the Companies Act, 2017 (XIX of 2017) and as required by these regulations have been kept by the Company;
- b. proper returns, statements and schedules for the purpose of audit of cost accounts have been received from branches not visited by us: and
- c. the said books and records give the information required by the regulations in the manner so required.

In our opinion and, subject to best of our information-

- a. the annexed statements of capacity utilization and stock-in-trade are in agreement with the books of account of the Company and exhibit true and fair view of the Company's affairs; and
- b. cost accounting records have been properly kept so as to give a true and fair view of the cost of production, processing, manufacturing, marketing, cost of sales, profit margin on indigenous and export sales and any other information of the undermentioned products of the Company, namely:

- White Refined Sugar

The matter contained in the Appendix III forms part of this report and approved by the board on

28 MAR 2026 . *RL*

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

**1. CAPACITY**

**a. Capacity:**

Basis of Measurement	Year	Unit of Measurement	Installed/ Approved Capacity	Utilized Capacity	% of Installed Capacity
Crushing	2025	M. Tons	*1,100,000	569,620.090	51.80%
Crushing	2024	M. Tons	*1,010,000	524,174.100	51.90%

\*The installed/ approved capacity of 1,100,000 M. Ton per annum is based on crushing capacity of 10,000 M. Ton per day communicated by Directorate General of Industries, Prices, Weights and Measures, Punjab through order dated 13 February 2023 to the management and 110 (2024: 101) days of actual crushing period.

\*The increase in actual crushing this year compared to the previous year is due to the availability and procurement of sugarcane in higher quantities. Further during the year operating days has been increased from 101 to 110. Taking these factors into account, the percentage of capacity utilization remained almost consistent with the previous year.

**b. Other Activities:**

The Company is not engaged in any other activity besides the manufacture of the product under reference.

c. The plant is owned by the Company and there were no leasing arrangements in place in relation to capacity.

**d.**

Basis of Measurement	Year	Unit of Measurement	Installed Capacity per day	Adjustment (Stoppage - days)	No. of days worked	Normal Capacity
Crushing	2025	M.Tons	10,000	9.24	100.76	1,007,600
Crushing	2024	M.Tons	10,000	5.67	95.33	953,300

**2. COST ACCOUNTING SYSTEM**

The Cost Accounting System was discussed with the management of the Company and reviewed in order to assess the adequacy of the system. The Company is using an integrated Accounting System in which cost accounting functions and financial accounting functions are combined in one system of ledger accounts. This enables the Company to get information regarding cost records at any point of time.

The existing system can generate various cost reports some of which are as follows:

- i. Direct department cost. *2.*

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

- ii. Distribution of total production cost into raw material and other manufacturing cost.
- iii. Detail of direct cost of sugar.
- iv. Detail of total cost of sugar.
- v. Direct and indirect cost of salaries and wages.
- vi. Stock valuation of stores, spares and loose tools.
- vii. Direct cost of production departments.
- viii. Total cost of production departments.

**3. PRODUCTION**

**a. Production quantities:**

Sugar	Production (M.Tons)	
	2025	2024
White refined sugar	54,991.500	52,798.400

**b. Percentage of production to installed capacity:**

Sugarcane	2025	2024
Installed/ approved Capacity	1,100,000.000 M.Tons	1,010,000.000 M.Tons
Utilized Capacity	569,620.090 M.Tons	524,174.100 M.Tons
<b>% to total installed capacity</b>	51.80%	51.90%

**Explanation of variance:**

The increase in actual crushing this year compared to the previous year is due to the availability and procurement of sugarcane in higher quantities. Further during the year operating days has been increased from 101 to 110. Taking these factors into account, the percentage of capacity utilization remained almost consistent with the previous year.

**c. Addition to production capacity:**

The production capacity has remained the same during the season as compared to last year.

**d. Comparison of machine hours utilization (during crushing season)**

Basis of Measurement	Year	Unit of Measurement	Available Capacity (Crushing period × 24)	Utilized Capacity	% of Available Capacity
Crushing	2025	Machine Hours	2,640:00	2,418:35	91.60%
Crushing	2024	Machine Hours	2,384:60	2,248:50	94.30%

2.

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

**4. RAW MATERIALS:**

**a. Major raw material consumed:**

**Sugarcane**

Year	Sugarcane consumed (M. Tons)	Value (Rupees)
2025	569,620.090	5,964,858,972
2024	524,174.100	6,056,347,458
2023	455,913.605	3,531,653,352

Year	Sugarcane consumed	Refined Sugar Produced	Sugarcane Consumed Per Ton of Refined Sugar
	M. Tons		
2025	569,620.090	54,991.500	10.36
2024	524,174.100	52,798.400	9.92
2023	455,913.605	45,338.900	10.06

Consumption of raw material per unit of production is dependent on many factors, such as sucrose contents/ sugar recovery percentage, quality of sugarcane, elapsed time between sugarcane harvesting and crushing, distance from sugarcane field and factory site and un-interrupted milling/ crushing etc.

As there are no established standard requirements available, comparison of consumption of raw material per unit of production can only be made with prior years of the Company.

**Explanation of variance:**

Sugarcane consumption per ton of refined sugar increased to 10.36 tons in 2025 as compared to 9.92 tons in 2024, showing an increase of approximately 0.44 tons of sugarcane required to produce one ton of refined sugar. This indicates a slight decline in the overall sugar recovery efficiency during the current year, resulting in higher sugarcane requirement for producing one ton of refined sugar. The variation may be attributed to differences in the quality of sugarcane, harvesting conditions, and overall crop characteristics during the year. Management continues to focus on improving operational efficiency to enhance recovery levels in the coming periods.

**b. Method of accounting:**

Sugarcane is procured mainly at the mills directly and partially at depots situated at a number of locations. Cost of purchase of raw material comprises of purchase price, transport, government levies, handling and other costs directly attributable to the acquisition of materials. Purchases of sugarcane are accounted for when they are received at mills/ purchase centers and valued at prevailing rate announced by government for the season. CPRs are issued mentioning quantity and value for each purchase of raw material. Procured sugarcane is directly consumed in production.

**c. All raw material was procured through domestic purchase.**

*2.*

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

**Explanation of variance:**

The increase in cost per metric ton is mainly attributed to a 20.86% rise in labour costs this year (2024: 27.61%), driven by higher minimum wages, annual increments, and bonuses. Furthermore, the crushing period was extended to 110 (2024: 101) days, and production increased by 4.15% compared to the previous year. This led to the hiring of more daily wage workers, which, in turn, resulted in an additional cost of Rs 567.45 per metric ton (2024: Rs 309.28).

- f. The Company has no incentive scheme contributing towards increasing productivity.

**6. STORES AND SPARES**

**a. Expenditure per M.Ton of output:**

2025		2024	
Total store consumed	Cost per M.Ton of output	Total store consumed	Cost per M.Ton of output
Rupees	Rupees	Rupees	Rupees
96,107,549	1,748.68	97,968,590	1,855.52

**b. System of stores accounting:**

Store receipts are recorded on the basis of receiving report/ goods inspection note, gate inward passes, purchase order, demand notes etc. Issuances of stores are made on the basis of issue requisitions received from the relevant department.

**Receipts of stores and spares:**

These are valued at cost comprising of purchase price, import duties, other taxes, and other costs directly attributable to the acquisition of stores and spares except transportation and handling cost which is separately charged to production. Purchase price is determined through vendor invoices and other duties and taxes are recorded on actual basis. Receipts are only recorded when actually received in store and its relevant documents have been generated and authorized i.e. good receipt note (GRN), gate inward pass and inspection report by store incharge.

**Issues and balance of stores and spares:**

Store requisition slip is generated by relevant department and sent to store for issuance. Store in charge checks the availability in stock and issues the store item at current weighted average rate and if the inventory is not available in store, purchase requisition is generated by store in charge.

Stores and Spares are valued on lower of weighted average cost or net realizable value. Goods in transit are valued at cost plus other charges paid till statement of financial position date. Impairment testing is conducted on regular basis and provisions are recorded for obsolescence, if any.

- c. Provision for obsolescence against slow moving items amounted to Rs. 16,041,549/-, (2024: Rs. 16,041,549/-) that is 6.20%, (2024: 7.25%) of closing inventory.

**7. DEPRECIATION**

**a. Method of depreciation:**

Depreciation on all operating fixed assets, except ROUA and land is charged on reducing balance method. Depreciation on ROUA is charged on straight line basis while no depreciation is charged on

*2.*

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

freehold land. Depreciation on addition is charged from the month the asset is capitalized. No depreciation is charged on disposal from the month the asset is disposed off.

**b. Basis of allocation of depreciation on common assets:**

Depreciation on assets identifiable to various cost centers is charged on actual basis while depreciation for assets under common use is charged to cost centers on the basis of services rendered to the respective departments.

**c. Basis of charging depreciation to cost of product:**

The depreciation of depreciable assets relating to units involved in manufacturing of product is charged to the cost of production. Management assessed that depreciable asset involved in production comprise 96.61% of total assets of the Company. Therefore, total depreciation charge for the year is apportioned on the same basis and the portion chargeable to production units is charged to cost of product.

**8. OVERHEADS**

**a. Total amount of overheads:**

Sr. #	Overheads	2025	2024	2023
		Rupees

ix	Fee and subscription	200,000	355,610	90,000	(155,610)	265,610
x	Insurance	1,264,262	1,067,936	1,002,063	196,326	65,873
xi	Other factory overheads	28,556,747	18,715,812	12,649,976	6,058,439	6,065,836
<b>Total</b>		<b>619,756,045</b>	<b>592,163,603</b>	<b>529,838,348</b>		

**Explanation of variances:**

The increase in factory overheads during the current year is mainly attributable to higher operational activity and inflationary cost pressures. Although production increased by 4.154% compared to the previous year, the Company successfully optimized the utilization of packing material. However, indirect labour cost increased by 19.21%, primarily due to the increase in minimum wages and annual salary increments. In addition, fuel and power costs also increased owing increased production activity. During the previous year, the Company experienced maintenance challenges that resulted in the loss of 136.10 crushing hours. In the current year, improved plant performance and better maintenance planning helped reduce repair and maintenance expenses by 3.05%. This improvement also included the replacement of outdated components with modern equipment to enhance operational efficiency.

**Administrative and other operating overheads:**

<b>Total</b>		<b>250,200,497</b>	<b>162,291,124</b>	<b>244,669,885</b>		

**Explanation of variances:**

Administrative and other operating overheads during 2025 increased by approximately 33.13% as compared to 2024. The increase is mainly due to salaries, wages and benefits which increased by about 13.72% as a result of annual salary increments and employee benefit adjustments. Traveling and conveyance expenses increased significantly by around 291.87% due to higher management and operational travel during the year, while telephone and postage expenses increased by about 39.17% reflecting greater administrative activity. In addition, charity and donations increased by approximately 235.18% to support flood relief activities. However, certain expenses such as director's meeting fee decreased by 44.93%, fee and subscription by 26.31%, insurance by 39.06%, and vehicle running expenses by 14.57%, indicating better cost control in these areas. Overall, despite increases in some administrative costs, the Company maintained reasonable control over administrative and other operating overheads during the year. Furthermore, Workers' Profit Participation Fund (WPPF) and Workers' Welfare Fund (WWF) have been recognized during the current year, which also contributed to the overall increase in administrative and other operating overheads. 2.

<b>Total</b>		<b>61,437,579</b>	<b>29,978,859</b>	<b>37,312,887</b>		

**Explanation of variances:**

Selling and distribution overheads during 2025 increased significantly compared to 2024, mainly due to higher export-related selling expenses and increased employee costs. Salaries, wages and benefits increased by approximately 106.16%, primarily due to the hiring of additional manpower and annual salary increments. Furthermore, other selling expenses related to exports increased substantially by around 1,525%, mainly attributable to a significant rise in export volumes, which increased by 227.55% during the year.

**c. Basis of allocation of overheads:**

Identifiable costs are separately allocated to each cost center, while common costs are allocated on some rational basis like depreciation expense is allocated on the basis of 96.61% to cost of sales and 3.39% to administrative expenses.

**d. Cost of packing material:**

Particulars	2025	2024
	Rupees	Rupees
Poly propylene bag	48,174,351	51,567,277
Thread cone (1kg thread white)	504,432	499,803
Thread cone (20/6)	-	5,374
Thread cone (250 g)	52,140	1,578
Stamps	-	-
<b>Total</b>	<b>48,730,923</b>	<b>52,074,032</b>
<b>Total sugar produced (M.Tons)</b>	<b>54,991.50</b>	<b>52,798.400</b>
<b>Cost per M.Tons of sugar (Rs/ M.Tons)</b>	<b>886.15</b>	<b>986.28</b>

**9. ROYALTY / TECHNICAL AID PAYMENT**

The Company has not paid any amount as royalty/ technical services fees for the year. Therefore, disclosure of total amount and the amount chargeable per unit of the product is not applicable to the Company. 2.

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

**10. ABNORMAL NON-RECURRING FEATURES**

- a. There were no abnormal features affecting production during the year. Therefore, disclosure of impact on cost of production and allocated cost per unit is not applicable to the Company.
- b. The Company manufactures only one product i.e. white refined sugar and there are no special expenses which may be directly attributable to that product.

**11. COST OF PRODUCTION (Refer annexure 1)**

**Cost per unit (during the year):**

Product	2025	2024	Increase/ (Decrease)	
	Rupees/ M.Ton	Rupees/ M.Ton	Rupees/ M.Ton	Percentage
White refined sugar	141,777.72	134,157.60	7,620.12	5.67%

**Explanation of variance:**

The moderate increase is primarily attributable to changes in sugarcane procurement practices during the year. In the previous year, the procurement price of sugarcane was fixed by the Government, whereas during the current year the Company procured sugarcane at various market-based rates. This reduction in the average procurement price helped offset the impact of increases in other cost components, resulting in a relatively lower increase in the overall production cost per ton compared to the previous year.

**12. SALES**

a. Sales (Local)	<u>2025</u>	<u>2024</u>
Sale of white sugar (Metric ton)	68,540.55	42,453.65

White refined sugar	2025 (Rupees)		2024 (Rupees)	
	Rupees	Rupees per M.Ton	Rupees	Rupees per M.Ton
Net sale	8,873,625,017	129,465.33	4,958,147,337	116,789.66
Sales tax and FED	1,783,103,239	26,015.30	975,656,521	22,981.69
Gross sale	10,656,728,256	155,480.63	5,933,803,858	139,771.35

The above mentioned sales does not include sales of by products and related sales tax amounting to Rs. 876.328 million and Rs. 135.239 million respectively. It has been observed that there is only one category, variety or quantity of product under reference.

b. Sales (Export)	<u>2025</u>	<u>2024</u>
Sale of white sugar (Metric ton)	4,513.00	1,134.00

White refined sugar	2025 (Rupees)		2024 (Rupees)	
	Rupees	Rupees per M.Ton	Rupees	Rupees per M.Ton
Net sale	631,454,776	139,919.00	192,780,000	170,000.00
Sales tax	-	-	-	-
Gross sale	631,454,776	139,919.00	192,780,000	170,000.00

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

**Exported products:**

During the year, the average cost of production was Rs. 141,777.72 per metric ton; however, after inventory adjustments, the cost of goods sold reduced to Rs. 132,149.33 per metric ton (2024: Rs. 134,597.33). The Company sold 68,540.55 metric tons in the local market at an average price of Rs. 129,464.48 per metric ton (2024: Rs. 116,789.66 per metric ton). Furthermore, export sales of 4,513 metric tons were made at an average price of Rs. 139,919.00 per metric ton.

**13. PROFITABILITY**

**Profit/ (Loss) per unit (M.Ton):**

Description	2025		2024	
	Rupees	Rupees Per M.Ton	Rupees	Rupees Per M.Ton
Gross sugar sales (own manufactured)	11,288,183,032	154,518.34	6,126,583,858	140,557.79
Total cost to make and sell (Annexure-1)	10,396,058,579	142,307.37	6,816,585,067	156,387.99
Profit/ (loss) (owned manufactured)	892,124,453	12,210.97	(690,001,209)	(15,830.20)

The above does not include profitability of by-products.

Profitability per machine hour	2025	2024
	<b>Rupees</b>	
Profit/ (loss) (owned manufactured)	892,124,453	(690,001,209)
Machine Hours of actual crushing	2418:35	2,248:50
Profit/ (loss)/ Machine hour	368,897.98	(306,871.78)

**Comments:**

The profitability of the Company is primarily influenced by the market price of sugar and the support price of sugarcane determined by the Government. During the current year, the selling price per metric ton increased by 9.93%. Moreover, the sales volume also increased significantly by 67.6% compared to the previous year. In addition, the cost of production moderate increased by 5.67% as compared to last year due to improved operational efficiency and better cost management. As a result of higher selling prices, increased sales volume, and moderate increased production costs, the Company recorded a substantial improvement in profitability, leading to a significant increase in net profit per metric ton compared to the previous year. This increase in profit is primarily attributable to improved selling prices and higher sales volume during the year. Although the cost of sugarcane procurement increased by approximately 5.67% compared to the previous year, the overall cost structure was partially offset by a significant increased of 67.6% increase in the sales volume. Consequently, the combined effect of better pricing, increased sales volume, and efficient management of certain production costs contributed to the improvement in the Company's profitability..

It has been observed that there is only one category, variety or quality of the product under reference.

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

To maximize profit, the Company should focus on managing its purchase costs by providing advances to growers and negotiating better prices with them, which would allow the Company to acquire sugarcane at lower prices. Additionally, the company should aim to increase both sales volume and sales prices.

**15. DISTRIBUTION OF EARNING/ (LOSS)**

The earnings were distributed to the following parties:

<b>Particulars</b>	<b>Rupees</b>
Employees as salaries and wages, retirement benefits etc	410,664,751
Shareholders as dividends	-
Company as retained earnings	814,797,360
Governments as taxes	167,918,641
Extra ordinary expenses	-

**16. ADJUSTMENT OF COST VARIANCES:**

The Company maintains cost records on actual basis therefore, there are no variances between actual cost and the Company maintained records.

**17. COST AUDITORS' OBSERVATIONS AND CONCLUSIONS**

In the course of our examination of the cost accounts of **BABA FARID SUGAR MILLS LIMITED** for the year ended 30 September 2025, certain weaknesses in the procedures, internal controls and accounting methods came to our notice. We are giving below our observations and conclusions to draw attention to these matters. The responsibility for maintenance of an adequate system of internal controls as well as for prevention and detection of irregularities and frauds rests with the management.

Our audit involves evaluating only those systems and internal controls in the organization upon which we rely for the purpose of determining our audit procedures. Accordingly, our audit may not have identified, and the comments in this report may not be a comprehensive record of all the weaknesses that may exist. However, our audit was planned so that we would have a reasonable expectation of detecting material misstatements in the accounts.

**a. Matters which appear clearly wrong in principle**

There was no such matter. However, we have noted certain opportunities for improvement which are reported in suggestions for improvement in performance.

**b. Usage of the Company's funds**

There was no such observation/ finding where the Company's funds have been used in a negligent or inefficient manner.

**c. Controlling factors**

No instances were observed where factors which could have been controlled, but were not controlled, resulting in increase in cost of production. There is an adequate budgeting and control system. The Company has an effective internal audit and control function. The Board of Directors has constituted an audit committee, the meetings of which are held on regular basis.

**d. Suggestion for improvement in performance**

**i. Cost reduction and increased productivity:**

The Company can optimize production capacity by building strong pre-season relationships with growers and providing advances, such as sugarcane seeds. This strategy will ensure a

2.

**Baba Farid Sugar Mills Limited**  
**Appendix III**  
**For the Year Ended 30 September 2025**

steady supply of high-quality sugarcane at lower prices, ultimately boosting the production of white bagged sugar at a reduced cost.

ii. **Key limiting factors causing production bottle-necks:**

The utilization of installed capacity is dependent upon availability of sugarcane of desired quantity and quality. As a part of long term planning, the Company should start increasing its relationship with growers to ensure regular supply of desired quality sugarcane to fully utilize the production capacity.

**18. Reconciliation with financial statements:**

Sr. No	Particulars	2025	2024
		<b>Rupees</b>

**BABA FARID SUGAR MILLS LIMITED**

**1. STATEMENT OF CAPACITY UTILIZATION FOR THE YEAR ENDED 30 SEPTEMBER 2025**

**a. Capacity (Machine Hours)**

Basis of Measurement	Year	Unit of Measurement	Available Capacity (Crushing period × 24)	Utilized Capacity	% of Available Capacity
Crushing	2025	Machine Hours	2,640:00	2,418:35	91.60%
Crushing	2024	Machine Hours	2,384:60	2,248:50	94.30%

**Explanation of variance:**

Available hours are dependent upon the crushing period i.e. 110 (2024: 101) days. Sugar mills remained temporarily shut down for maintenance purposes and due to non-availability of sugarcane during the manufacturing season. This year the Company remained stopped for less period as compared to last year i.e. 9.24 days (2024: 5.67 days) thus decreasing the percentage of utilization in relation to available capacity by 2.70%.

**b. Capacity (Production unit):**

Basis of Measurement	Year	Unit of Measurement	Installed/ Approved Capacity	Utilized Capacity	% of Installed Capacity
Crushing	2025	M. Tons	*1,100,000	569,620.090	51.80%
Crushing	2024	M. Tons	1,010,000	524,174.100	51.90%

\*The installed/ approved capacity of 1,100,000 M. Ton per annum is based on crushing capacity of 10,000 M. ton per day communicated by Directorate General of Industries, Prices, Weights and Measures, Punjab through order dated 13 February 2023 to the management and 110 (2024: 101) days of actual crushing period.

**Explanation of variance:**

The increase in actual crushing this year compared to the previous year is due to the availability and procurement of sugarcane in higher quantities. Further, during the year operating days has been increased from 101 to 110. Taking these factors into account, the percentage of capacity utilization remained almost consistent with the previous year.
